

Leaflet

LJW

October 17, 2020

Introduction

Create a web page using R Markdown that features a map created with Leaflet.

Host your webpage on either GitHub Pages, RPubS, or NeoCities.

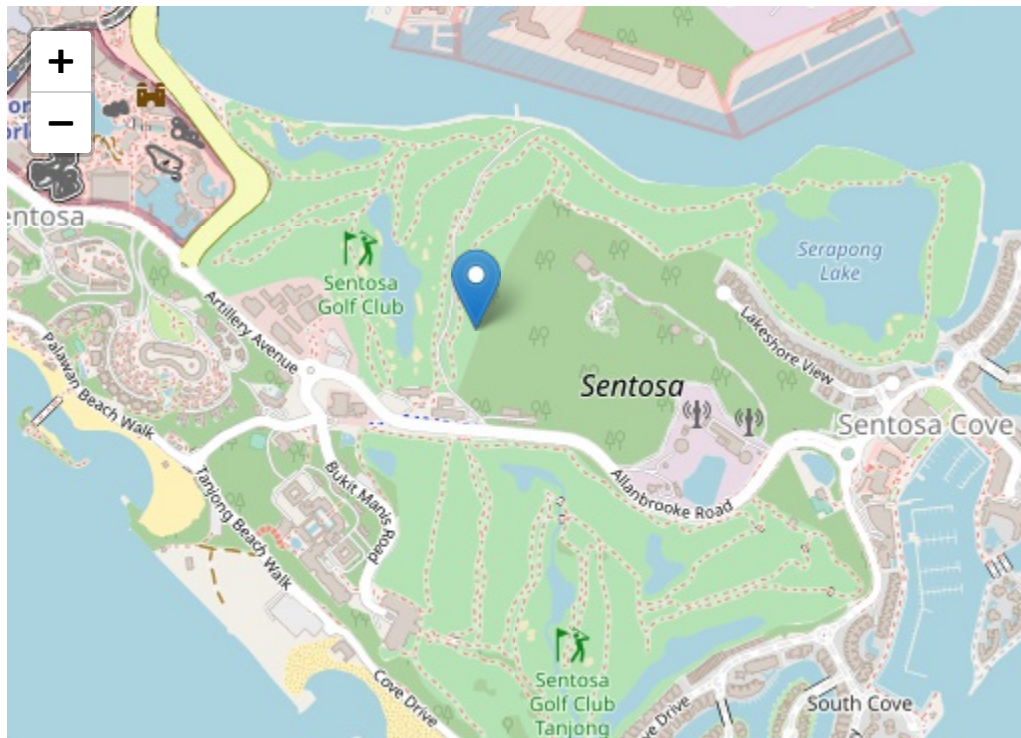

Your webpage must contain the date that you created the document, and it must contain a map created with Leaflet. We would love to see you show off your creativity!

My First Map - Attactions in Singapore

```
## Warning: package 'leaflet' was built under R version 3.6.3
```

Add the marker for Sentosa Island .

Attactions in Singapore - Sentosa

Adding Many Markers

Adding other attractions in Singapore

```
set.seed(999)
df <- data.frame(
  lat = c(1.25011, 1.28544, 1.318707, 1.282375, 1.4043, 1.4022, 1.4029, 1.2868, 1.3332, 1.2893),
  long = c(103.83093, 103.859590, 103.706442, 103.864273, 103.7930, 103.7881, 103.7917, 103.8545, 103.8545, 103.8545),
  df %>%
  leaflet() %>%
  addTiles() %>%
  addMarkers()
```

Cluster the attractions

Adding Icons
